

**AVAILABLE
FROM 1ST MAY
ON DT**

Save £2 with the complete kit promoting excellence in the treatment of venous leg ulcers

URGO are proud to offer **K TWO[®] START**, the synergy of two unique technologies promoting excellence in the treatment of venous leg ulcers.

K TWO[®] START combines **K TWO[®]**, the first compression system designed to spread the pressure across two dynamic layers (18-25cm or 25-32cm); with **URGOTUL[®] START**, the first TLC dressing impregnated with NOSF to kick-start healing (11x11cm).

This new kit provides all you need to treat leg ulcers in a single box, as well as being cost-effective (£2 less than the price of **K TWO[®]** and **URGOTUL[®] START**).

To have an overview of the efficacy of **K TWO[®] START**, it has been evaluated on a 4 year old leg ulcer and after 16 weeks, the wound was completely healed!
