

AVAILABLE FROM 1ST
SEPTEMBER ON DT

The TLC range, clinically proven in more than 30,000 patients, now includes two newcomers, UrgoCell® Start TLC and UrgoCell® TLC ...

TLC Technology has been clinically proven to promote healing by stimulating fibroblast proliferation and caring for patients by providing pain-free wound management.

This innovative range now welcomes a **new generation** of foam dressing: **UrgoCell® Start TLC**, a soft-adherent foam dressing with TLC-NOSF (Nano-Oligo Saccharide Factor), a unique compound scientifically created to **promote faster healing** in leg ulcers, pressure ulcers and diabetic foot ulcers. It is available in a range of sizes including a small size to cut costs and avoid wastage, as well as a specifically designed shape for heel pressure ulcers.

It is also available as a soft-adherent foam dressing with TLC for all low to moderately acute wounds (**UrgoCell® TLC**).
