

Calling all abstracts!

Submit your abstract by 10th November 2017

We are delighted to invite you to The College of Phlebology's 2nd International Veins Meeting in London, United Kingdom, 14th – 16th March 2018. The conference will be hosted by The College of Phlebology, in conjunction with the Leg Ulcer Charity, Lindsay Leg Club Foundation and the Venous Times Newspaper.

The aim of the CoPIVM 2018 is to bring excellence in Phlebology at the forefront of clinical practice. It emphasises on the importance of conducting first hand research that aims at increasing scientific knowledge which when applied has the objective to improving patient care.

We are calling for abstract submissions on the themes listed below. There will be a Prize Awards Dinner held on Thursday 15th March for the best oral and e-Poster presentations. More information on the Awards Dinner will be published in due course.

For more information and to submit your abstract please download the submission form from our website www.collegeofphlebology.com/meeting2018/abstracts or you can email us at: abstract@collegeofphlebology.com

Submission deadline: **10th November 2017.**

Themes

1. Thermal Ablation
2. Non Thermal Ablation
3. Pelvic Congestion Syndrome
4. Pelvic Vein Embolisation
5. Pelvic Venous Reflux
6. Recurrent Varicose Veins
7. Haemorrhoids
8. May Thurner Syndrome
9. Nutcracker Syndrome
10. Wound Care
11. Chronic Wounds
12. Leg Ulcers
13. Venous Reflux
14. Diagnostic Imaging of Venous Reflux
15. Thread, Spider, Arm, Foot & Breast Veins
16. Veins of the Vulva/Vagina
17. Sclerotherapy
18. Foam Sclerotherapy
19. Venous Imaging
20. Venous Obstruction
21. Thermal Necrosis
22. Venous Apoptosis
23. Transmural Vein Wall Death
24. Radiofrequency
25. Skin Damage
26. Ecchymosis
27. Thrombophlebitis
28. Venous Stenosis
29. Venous Ulceration
30. Venous Eczema
31. NICE Guideline for Venous Treatment
32. Nursing Guidelines for Venous Ulcers
33. Compression Therapy
34. Bandaging
35. Laser Wavelength
36. Mechanochemical Ablation
37. Chemical Ablation
38. Air Plethysmography
39. Facial Veins
40. Telangiectasia
41. Phlebectomies
42. Hemosiderin Staining
43. Sclerosant Composition
44. Aesthetic Phlebology
45. Classification and Scoring Systems
46. Great Saphenous Vein
47. Abnormal Anatomy
48. Ovarian/Pudental/Obturator Vein
49. Coil Migration
50. Vein Physiology

Learn - Watch - Understand – Ask

Learn – each subject or technique will start off with presentations on the basics – why we do it, who is suitable, what devices are used, how did this subject or technique develop. This will enable delegates with little or no experience in the area to get to grips with the subject or technique.

Watch – there will then be live links to ultrasound suites, operating theatres and radiology rooms where live cases will be performed by recognised experts in the field. Depending on the subject or technique being explored, the live cases may be both diagnostic and treatment. Delegates will be able to ask the specialists questions during the procedures, mediated through the session chairman. Delegates will not only see the latest procedures, but will be able to clear up any specific points of interest or technique immediately.

Understand – these subjects and techniques will then be analysed further – with presentations of the latest studies, devices and the relevant basic science, to deepen understanding and to help delegates understand how to improve their own practice.

Ask – finally, each subject or technique will be opened up for questions from any of the delegates attending, to make sure they have a chance to express their views or ask questions.
