

medi – here to help

At medi UK we understand the immense pressure you are currently facing as front-line NHS workers and would like to provide appropriate support in these challenging times.

Therefore, we are making our current working patterns more flexible and accessible to match your needs

Supply of medi products – direct-to-patient option

We have a good stock of medi products in the UK that are ready for same-day despatch. Delivery can be either to your clinical area or direct to your patient.

Our Prescription-by-Post service remains available for all medi products – simply pop the prescription in a Free Post envelope and we will deliver the product to you or your patient within a few days. If you would like envelopes to help deal with your medi supplies, please let us know. This service also applies to repeat prescriptions, thereby reducing the need for patients to leave their homes.

Encouraging self-care

We have a range of self-care solutions for you and your patients – using UCS debridement cloths, juxta wraps and hosiery enables you to encourage patient independence and reduce clinical face to face time.

If you have questions, suggestions, concerns or would like help - our clinical team are available for telephone support.

Contact us on: 01432 373500 or email enquiries.clinical@mediuk.co.uk ; we are here for you.
