

BSN medical launches JOBST® Comprifore multi-layer compression bandage system

Adding to its range of compression therapy products for the treatment of venous leg ulcers, BSN medical is pleased to announce that the JOBST® Comprifore multi-layer compression bandage system will be available on Drug Tariff from 1st March 2012.

The kits contain all the bandaging components needed to provide sustained, graduated compression of 40mmHg for up to 7 days. As well as being available as a 4 layer kit, JOBST Comprifore also comes as a "lite" version in 3 layers for treatment of mixed aetiology leg ulcers and in a latex-free formulation to reduce risk of allergy.

For ordering information and more details on BSN medical's range of products for the treatment of venous leg ulcers, please contact:
