Mölnlycke Launches Lyofoam Max

Mölnlycke Health Care has launched a new addition to its dressings range, Lyofoam Max, which is a highly absorbent, polyurethane foam dressing.

Lyofoam Max will replace the existing Lyofoam and Lyofoam Extra dressings and is available through both Drug Tariff and the NHS Supply Chain. The new dressing has been designed for the management of moderate to heavily exuding wounds and is ideal for patients with non-fragile skin. Lyofoam Max offers improved fluid handling ability, which surpasses both Lyofoam and Lyofoam Extra in terms of maximum absorption capacity and moisture vapour transmission¹.

Major advantages of Lyofoam Max include: Reduced risk of maceration, moist wound environment for optimal wound healing, easy to apply and remove and works well under compression. The waterproof backing film also acts as a barrier to bacteria and virus penetration and reduces the risk of leakage.

Julie Davis, Marketing Manager, says: "Lyofoam Max emphasises Mölnlycke's passion for excellence and innovation. It's a high quality foam dressing delivering improved clinical performance and available at a price which will allow customers to achieve cost savings against their existing Lyofoam or Lyofoam Extra usage."

Lyofoam Max comes in a wide range of sizes suitable for wounds with moderate to high exudate levels. For more information please contact Mölnlycke Health Care on 0800 7311 876.

-Ends-

Notes to Editors:

If you require a pack shot of Lyofoam Max please contact Carol Laing – carol@indigompr.co.uk or Tracey Halstead – tracey@indigompr.co.uk
