

The first foam dressing with the protease inhibitor NOSF proven to heal twice as fast as neutral foam dressings in a double blind RCT.

The **NEW URGOSTART®** range is available from 1st March 2011 it will replace the current UrgoCell® Start TLC (foam dressing) and Urgotul® Start (contact layer), now named **URGOSTART® & URGOSTART® CONTACT**.

The **NEW URGOSTART®** range continues to offer all the excellent and proven benefits of TLC-NOSF (Technology Lipido-Colloid – Nano Oligo Sacharide Factor):

- NOSF protease inhibitor to promote faster healing.
- Moist environment
- Pain free dressing changes
- Stimulation of fibroblast proliferation
- Protection and improvement of surrounding skin

URGOSTART® range is indicated for all chronic & recurring wounds

URGOSTART® is for low to moderately exuding wounds

URGOSTART CONTACT® is for non to low exuding wounds and can be combined with an absorbent dressing for heavily exuding wounds

Both dressings can be held in place with a film dressing or a suitable bandage (K Lite® or K Band®)

To order **URGOSTART®** and **URGOSTART® CONTACT** please find the dressing sizes and codes below;
