

Tour De TWC Press Release

On 26th September Rachel and Amanda from The Whiteley Clinic Bristol will be picking up their helmets and hitting the road as they cycle 120 miles in 24 hours to help raise money for the Leg Ulcer Charity.

They will be cycling from The Whiteley Clinic in Bristol to the head office in Guildford and would love to raise at least £500 for the charity, to help support the charity's work.

Rachel and Amanda have been part of The Whiteley Clinic family for a long time. Rachel is a Sonographer at our Bristol clinic and has been working there for 3 years; Amanda is the Lead Nurse and has been working at the Bristol clinic since it opened. In their free time, they both enjoy sailing, having fun and cycling - which should come in handy for the Tour De TWC!

Rachel and Amanda wanted to support the Leg Ulcer Charity, as they help diagnose and treat many patients with leg ulcers during their work and have personally seen the effect this debilitating condition can have on people. They also personally know people who have leg ulcers, so wanted to make a real difference to not just the people they treat, but their friends and family as well.
